

Notice:

Motor shaft length & electrical performance could be customized according to customer requirements.

■ Features

- High efficiency and energy saving
- Low temperature rise and long service life
- Wide speed range, stepless speed regulation
- Multiple security protection
Equipped with locked-rotor, over-current, over-voltage, and under-voltage protection, making it safer and more reliable to use.
- The speed does not decay, zero % speed attenuation rate.
- Signal function available
- Quiet, no noise, low EMI

■ Applications

- Air purifier
- Circulation fan
- Floor fan
- Without blade fan
- Smart home
- Intelligent robot
- Fascial massaging gun
- Massager
- Customized according to customer needs

■ Characteristics**Phase:**

3 phases

Rotation Direction:

CW rotation with shaft side view

Insulation Class:

E class (Except lead wires)

Operating Mode:

Continuous

Audible noise:

Ball bearing: < 45dB

Oil bearing: < 55dB

Life time:

Ball bearing: >10,000 hours

Oil bearing: >3,000 hours

Storage temperature range:

-20~70 °C

Operating temperature range:

Environment -20~50°C

Power transistor 105°C MAX

Bearing 80°C MAX

Coil 110°C MAX

Operating & storage humidity range:

30 ~ 95%RH No condensation

■ Mechanical Characteristics

■ Typical Performance/Specification

Model	Rated Voltage	No-load Speed	No-load Current	Load Speed	Load Current	Load Torque	Driving Methods	Power
BM45x	DC12/24v	3600rpm	0.2A max	3000rpm	1.25A max	50mN.m	PWM (1-15k)	30W

- (1) The x in the model no. represents the voltage / power / rpm, which are customized according to customer requirements.
- (2) If possible, original application load/device (e.g. fan blade) part and control panel PCBA are required before designing, please send to our address.
- (3) Control methods could be with Hall Sine Wave, with Hall FOC, without Hall FOC, PWM etc.
- (4) Safety model number differs from the order number, part number, and shape number as per respective OEM/ODM factories.
- (5) Data in this typical specification sheet is for reference, voltage, rated torque, speed, current, power, shaft extension feature, and dimension could be designed according to customer requirement.
